Background

Comhairle Cathrach Chorcaí
Cork City Council

The Glanmire to City Cycle Route (Phase 2) is a proposed active travel facility that extends from Cork City Centre to Dunkettle.

The proposed facility will provide a safe pedestrian and cycle route that extends from the City Centre to Glanmire, Little Island, Carrigtwohill and surrounding area.

The proposed facility will eventually form part of an Inter-urban greenway that will link Cork and Waterford cities.

The proposals currently being put forward for public consultation include:

- A 5km walking and cycling route
- 2 new pedestrian & cycle bridges
- New pedestrian crossings
- New public lighting
- Tree planting & pollinator friendly planting
- Placemaking opportunities

These proposals align with Cork City Council's broader regeneration plans for the North Docks and Tivoli areas. Over the course of the next decade there will be significant private sector and public sector investment in the Cork Docklands which will transform the area into a world class destination including high quality quayside amenity spaces.

Pathfinder Cork-Waterford Route

5km route from City Centre to Dunkettle

The Glanmire to City Cycle Route (Phase 2) establishes an active travel route through the North Docks and Tivoli which will be enhanced over time with significant investment in the public realm as the area develops.

Penrose Quay

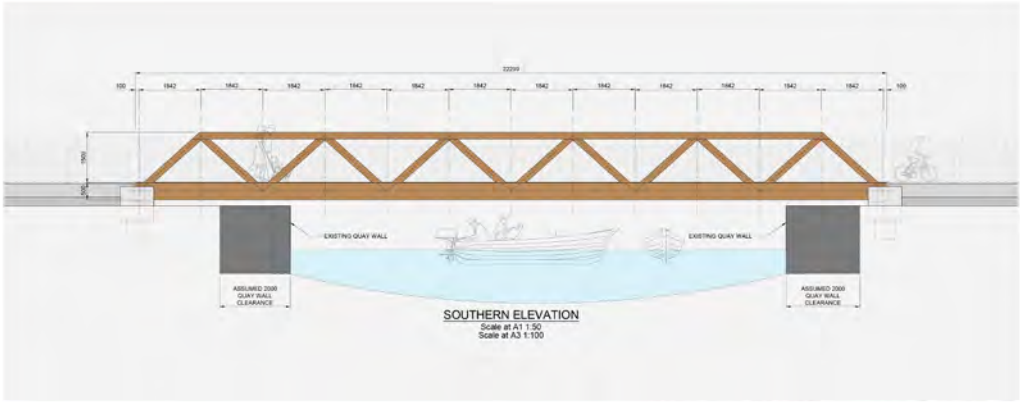
McMahon Site

Comhairle Cathrach Chorcaí
Cork City Council

McMahon Site - Layout and Landscape Plan



Proposed bridge over dry-dock

Proposals for McMahon site include:

- A 5m wide shared pedestrian and cycle facility
- A new bridge crossing the existing dry dock
- New public lighting

The proposed bridge will be designed to respect the industrial heritage of the site which was formerly a ship builders' yard.
